

SA

The Design Consultants Model SA Automatic Sealant Applicator provides high speed part handling (up to 1800 parts per hour), fluid dispensing and cassette load on a single small frame.

Precise fluid dispensing with fluid presence verification.

Simple operator interface with touch-screen graphics and light tower for machine status.

Vibratory feed from large capacity bowl. Automatic part orientation on feed track.

Walking beam design for complete part control.

Automatic cassette loading system. Multiple cassettes allow continuous operation and off-line curing.

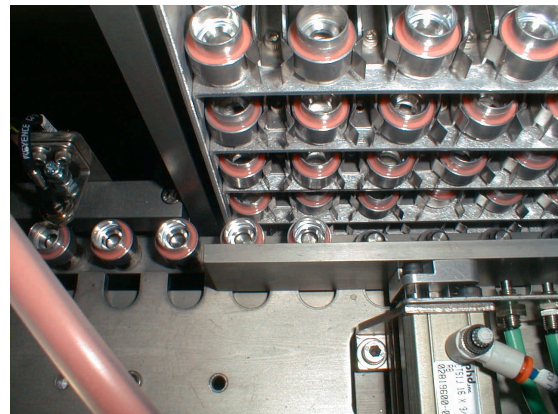

Part count and run rate are continuously updated.

Maintenance Mode provides total machine control for troubleshooting and adjustment.

Enclosed solvent cabinet for vapor control.

Fluid dispense

Automatic cassette load
